

Cola[®] Mid 0071

INCI Name: Lauramide DEA

DESCRIPTION

Cola[®] Mid 0071 is a 1:1 lauric diethanolamide offering a combination of foam boosting, foam stabilizing, and viscosity building properties with liquidity at room temperature for optimum ease of handling.

It is specifically designed to give the same high foam and viscosity properties obtained with the classic 70/30 lauric/myristic diethanolamide, but without the difficulties of handling a solid product.

Cola[®] Mid 0071 is recommended at concentrations of 4-6% for use in most shampoos, bubble baths and skin cleansers, as well as household and industrial liquid detergents.

TYPICAL PROPERTIES

| | |
|-------------------|--------------------|
| Appearance | Clear Amber liquid |
| Color (GVCS-33) | 7 |
| pH (10% Solution) | 10.5 |
| Acid # | 1 |
| Alkali # | 35 |
