

# Cola<sup>®</sup>Mid 16

INCI Name: Oleamide MIPA  
CAS No: 111-05-7

## DESCRIPTION

**Cola<sup>®</sup>Mid 16** is a unique non-ionic surfactant for use in a variety of applications. **Cola<sup>®</sup>Mid 16** has excellent corrosion inhibition properties on metal and has use in lubricants as both an emulsifier and a corrosion inhibitor. **Cola<sup>®</sup>Mid 16** is also useful in preparing water-in-oil invert emulsions for polymerization, leading to high molecular weight polymers such as those used in water treatment. **Cola<sup>®</sup>Mid 16** is also useful as a low HLB emulsifier in all continuous phase emulsions.

## APPLICATIONS

- **Metal working:** lubricants, emulsifiers, corrosion inhibitors
- **Polymerization:** used to prepare water-in-oil emulsions for production of high molecular weight polymers
- **Personal care:** shampoos, conditioners, emulsifier for skin care creams and lotions

## TYPICAL PROPERTIES

Appearance at 40°C	Clear yellow liquid (tan solid at 25°C)
pH (1% aqueous)	8.0 – 9.5
Activity, %	100
Alkali Number	4.5 – 7.5
Acid Value, mg KOH/g	8 max
HLB	6 – 8
Density, lbs./gal.	7.67
Titer	25 – 26°C

## AVAILABILITY

**Cola<sup>®</sup>Mid 16** is available in 55-gallon, open-head, poly drums (400 lbs.), in totes and in bulk.
