**SECTION 4 – FIRST AID PROCEDURES**

- 4.1 Exposure to Eyes:** Immediately flush with copious amounts of water for at least 15 minutes. Do not remove contacts if worn. Consult physician immediately.
- 4.2 Exposure to Skin:** Immediately flush with copious amounts of soap and water for 15 minutes. Remove and launder contaminated clothing before reuse. If irritation persists, contact physician.
- 4.3 Exposure by Inhalation:** Remove to fresh air. If irritation persists, contact physician.
- 4.4 Exposure by Ingestion:** If patient is conscious and can swallow, give 2 glasses of water. Call physician or poison control immediately. **Do not induce vomiting.**
- 4.5 Note to physician:** There is no specific antidote. Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient. Any material aspirated during vomiting may cause lung injury. If it is considered necessary to evacuate the stomach contents, this should be done by means least likely to cause aspiration (e.g., gastric lavage after endotracheal intubation).
