## PROCEDURE:

Combine phases A and B separately with heating to 65½°C. Homogenize B into A for a sufficient time to ensure good emulsification. Stir cool to 45½°C and add fragrance.

## COMMENTS:

This smooth cream provides instant relief of dry, chapped skin with a quick-breaking formula. A generous amount of emollients and glycerin are delivered to the afflicted areas while the COLA™ LIPID ST eliminates any greasiness and leaves the skin with an elegant after-feel.
